

FITTING GUIDE: 2.7 FITTING DECO FRAMES WITH SKIRTING

Design: Cutting skirting

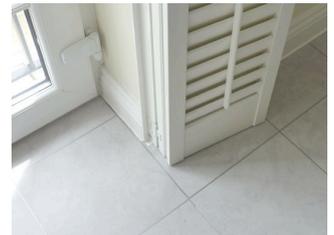

Skirting board around patio doors can be cut back to allow the Deco frame to run neatly to the floor.

Cutting the skirting can be done carefully with a hand saw or with a multi saw as shown here.

Use the top part of the Deco frame to mark the width of your cuts. Centralise it between the skirting and mark the overall length each end. Square the lines up the skirting and cut to your lines.

Design: Skirting examples

Here are some examples showing the skirting board that has been cut around Deco frames.
